Backend	NodeJS (ExpressJs),
Databases	mySqlLite
Languages	Java, Python
Other tools	ServiceNow, SharePoint, Excel, git(version control)

## Projects

### E-Commerce Application

(<https://preethamjon.ccbp.tech>)

Implemented an E-commerce application which is a clone for ECommerce applications like Amazon, and Flipkart where users can log in and see a list of products with search, filters, sort by, etc.

- Implemented Different pages and routes for Login, Products, and Product details using React Router components Route, Switch, Link, props, state, lists, event handlers, and form inputs.
- Authenticating and authorizing users by taking username, password and doing login POST HTTP API Call and implementing filters by sending them as query parameters to product API calls.
- Persisted user login state by keeping JWT token in local storage, Sending it in headers of further API calls to authorize the user.

**Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

### Wikipedia Search Application

(<https://jpwikisearch.ccbp.tech>)

Developed a custom Wikipedia search application where users can search and view curated results and see detailed explanations in Wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlinks as URL, styled list using CSS, Bootstrap, and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from the server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in the HTML

**Technologies used:** HTML, CSS, JS, REST API Calls, Bootstrap

### Food Munch Application

(<https://jpfoodmunch.ccbp.tech>)

Developed a responsive website for a Food Store where users can see a list of food items, detailed information about a food item, offers

- Designed page using the following HTML structure elements like li, header, article, footer elements, and different bootstrap components to show different sections in the website and different bootstrap classes for responsiveness through the mobile-first approach.
- Changed the order of elements using the Bootstrap order function

**Technologies used:** HTML, CSS, Bootstrap

## **Certification\*** (In Progress)

---

- **Nxtwave** - Industry Ready Certification in Full Stack Development

**2022-present**

## **Experience**

---

### **Tata Consultancy Services**

*Application Analyst [Nov 2021 – Dec 2023]*

Client Name: Tate & Lyle

- Built team sites based on the requirement using the SharePoint tool
- Updated a lot of sites and built a robust permission matrix
- Calculated the ticket flow using pivot tables and charts and helped the project in resourcing
- Provided knowledge training sessions on the ServiceNow tool
- Provided round-the-clock support to resolve any issues with access to the application and functionality
- Assisted in starting up and shutting down servers and services responsible consulted or informed

## **Other Skills & Achievements**

---

- I ran an NGO for one year comprising 30 members
- Playing chess, reading books, table tennis
